

**PROPOSED PURPOSES AND GOALS, OF PROPOSED JOINT COMMITTEE ON COLD WAR STRATEGY**

**1.**

Our finest analysts have determined that our floundering country can be saved through a well-defined Joint Congressional Committee on Cold-War Strategy. It must be granted teeth, and prestige. It should have the power to mobilize, collect, and collate the strongest, most intense deterrents to war. It will commingle the most brilliant academic, and practical wisdom and knowledge, plus the experience of the finest American-gearred brains in government, industry, communications, education, economics, foreign affairs, labor, and defense. Self-sacrificing and knowledgeable men and women must be given the opportunity to educate able men and Congress, whose duties have prevented their absorbing the see-saw qualities of the soviet strategy. Through Congress, the public at large can become informed, and aware of the urgent need to develop the fourth weapon as an alternative to atomic war. The persons who are planning for the policy of "disengagement" must be shown that semantics cannot hide the fact of appeasement.

This Joint Committee on Cold-War Strategy can demonstrate that the dissipation of our country's wealth is exactly as suicidal as the men in the Kremlin planned for it to be. This Committee can show that the friends which our imprudent and short-sighted policy were to have "bought", stand up and get counted with the sworn enemy when put to a vote. Through concrete evidence, undisputed on record, this Joint Committee will be able to direct where and how our country's resources can and should be used only for the purposes of improving our strength and knowledge, both domestically and externally.

In like manner, this Committee can prove the need for, and plan the most effective measures to sap the strength of the communist world, both economically and psychologically. It can employ measures guaranteed to destroy the prestige which the communist world enjoys among the so-called neutrals. It will be able to analyze and show the precise meaning and implications of neutralism.

This Committee can wage relentless psychological warfare against all communist regimes, by spotlighting the same bloodstream running through them. It must vigorously restore the hope and faith of all proven and effective anti-communist exile, underground, and resistance groups, both here and throughout the world.

This Joint Committee must seek out, and constructively employ all present and potential points of conflict between the two large red empires, Soviet Russian, and Red China, particularly as they apply to the planned enslavement of the mid-east, and Africa.

To operate with complete effectiveness, this Committee must be given the power to evaluate present intelligence, which might, through delinquency, leave us helpless and exposed in unforeseen emergencies. No defense, either in a hot or cold war, is any better than its intelligence services, whose hands hold our life or death.

2.

This Committee must plan for military and economic aid ONLY to cooperating allies. It must observe present military alliances which are truly honored by our contracting allies, and form new alliances ONLY for the period of the emergency, ALWAYS SUBJECT TO REAPPRAISAL OF THEIR VALUE TO US.

This Committee must show the need to return to open diplomacy, except in the rare instances where PROVEN military security imposes secrecy.

The Committee must show that the God-given instinct for survival demands that we withdraw recognition from the soviet union and all its satellites. It must also bring out all the carefully hidden revolts, and other attempts to gain freedom, in areas enslaved by the Soviet Empire, and the Red Chinese Empire. It should be in a position to get this knowledge across to the so-called "uncommitted" nations and nationalities which are outlined on the communist menu.

This Committee must be given the power to ensure the effectiveness of communications media which reach deliberately around the world.

This Joint Committee must be given the power to remove some of the impediments to our security, which have arisen as the result of certain decisions of the Supreme Court. Since domestic subversives are effective tools of soviet strategy and techniques, we cannot win a cold war while their weapons of both hot and cold war remain in strategic positions to nullify even our cold-war strategy.

This Committee must analyze and study all possible barriers to our self-protection which presently exist, and try to remove them before we may be made defenceless.

This Committee must stress and publicize all the weapons of the soviet empire which are too little understood today, such as economic and trade activities planned to our detriment. Our intelligence services must help us to plan to counter these tactics before they become evident. But we must seize the initiative and stop finding ourselves always on a defensive stand, and trying to counteract what they, the communist world, are doing to hurt us at home, and around the universe.

This Committee should be able to demonstrate the need for stronger hemispheric solidarity, and strengthen known friendships to the south, especially. Latin America has been too long overlooked, and its true significance underrated, in our world picture.

This Committee must show through analysis why we must hurriedly expose and oppose all activities which trend towards a world state, super-government, or the transfer of decisions for American security and welfare to foreign powers and/or nationals. THUS: the Committee must press for the expulsion of communist member states from the United Nations.

---

**PROPOSED PURPOSES AND GOALS OF PROPOSED JOINT CONGRESSIONAL COMMITTEE ON  
COLD-WAR STRATEGY**

**3.**

Reform the U.N. by removing all semblance of a permanent military alliance, and SEPARATE IT FROM ITS SPECIALIZED AGENCIES.

Amend our Constitution to provide that neither the U.N. Charter, nor treaties, nor covenants, shall supersede it. EVER.

INVALIDATE THE STATUS OF FORCES TREATY.

This Joint Committee can ensure that all our foreign policy is based on a solid foundation of patriotism, enlightened nationalism, and moral law,--but above all, integrity, and self-respect based on confidence in our moral rightness and free institutions, and supreme confidence in our strength, which this Committee, through the powers granted to it for the duration of this emergency, can and must ensure.
